Copenhagen SV  
Oct. 11

Dear Hugh,

I am very sorry to have let your long letter and your short announcement go unanswered for several months. The last one came soon after Charlie had told us about your marriage, and needless to say we were immensely pleased. When I got your letter I was of course glad to learn that you may come to Europe. Now it turns out, however, that we go to the U.S. next week and stay at MIT until around April. As you may know, Bohr will give some lectures at MIT during November, and in January we expect to be in Princeton. I hope that this journey will not prevent us from seeing each other and I look forward very much to talking with you again and especially to discussing the arguments in your letter.

Bohm has been here for a few months and we have had many pleasant discussions. He is working hard on a new interpretation.

Please write me at MIT about your plans.

Sincerely,

Greetings to you & your family  
from Betty
